## Guide to Information Sources Not Listed in the Tables

- American Statistics Index (ASI) and Statistics Reference Index (SRI). Congressional Information Service, Inc., 4520 East-West Highway, Bethesda, Maryland 20814. Both are annual, with monthly supplements. The ASI is a guide to data collected by the federal government. The SRI indexes state government and private data sources.

- Bureau of the Census Catalog, 1985. U.S. Bureau of the Census, Washington, D.C. For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.
  This catalog contains abstracts of products issued in 1984 and 1985, ordering information and forms, an index, and lists of sources of assistance. It also includes a special section which consolidates information about all products, regardless of the year of issue, from the 1982 Economic Censuses, the 1982 Census of Governments, and the 1982 Census of Agriculture.

- County and City Data Book, 1982. U.S. Bureau of the Census, Washington, D.C. For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.
  Issued every five years. Provides data from the most recent censuses, and data from other government agencies and private sources. Provides statistical data for every county, and every city with a population of 25,000 or more, as well as metropolitan areas, states, regions, and census divisions.

- Economic Conditions in Montana, 1984. Census and Economic Information Center, Montana Department of Commerce, Helena, Montana 59620.
  An analysis of the Montana economy in a national and international context. Contains information on key industrial sectors including agriculture, mining, manufacturing, and industries related to tourism.

- Editor and Publishers Market Guide. Editor and Publisher Co., Inc., 575 Lexington Ave., New York, New York 10022.
  Annual publication that presents copyrighted market survey data for states, larger counties, and larger cities.

- Montana Statistical Abstract, 1984. Census and Economic Information Center, Montana Department of Commerce, Helena, Mt. 59620.
  484 page compendium of information on the Montana population, economy, and natural resources.

- Montana Statistics. Bureau of Business and Economic Research, University of Montana, Missoula, Montana 59812.
  Annual supplement to Montana Business Quarterly magazine.

- Montana Statistics in Brief (monthly), Montana Employment and Labor Force, (quarterly), and Montana Employment, Wages and Contributions (quarterly and annual). Research and Analysis Bureau, Montana Department of Labor, Helena, Montana 59620.

- Statistical Abstract of the United States (annual). U.S. Bureau of the Census, Washington, D.C. For sale by the U.S. Government Printing Office, Washington, D.C. 20402.
  A national data book and guide to sources of information.

- Survey of Buying Power. Sales & Marketing Management magazine, 633 Third Ave., New York, N.Y. 10164.
  Annual publication presents copyrighted data on population, retail sales, and effective buying income for states, counties, and selected cities.

- Users' Guide. 1980 Census of Population and Housing. Part A: Text. Part B: Glossary. Part C: Index to Summary Tape Files 1 to 4. U.S. Government Printing Office, Washington, D.C. 20402.
  Provides an authoritative reference for the users of the 1980 census data including definitions of terms, specific questions asked in the census, information products available, and service offered by the Census Bureau.

# A P P E N D I X  B

The following notes and definitions are limited to a few concepts related to the presentation of statistical data in the Profile tables. Data users can find additional information in source documents listed at the bottom of each page of the profiles. In most cases printed reports containing even more information than that provided in the Profile tables are available.

County Geography: Anaconda-Deer Lodge County and Butte-Silver Bow County except Walkerville are areas where census boundaries were consolidated so comparable 1980 data for cities is not available.

Establishment: For census purposes, an establishment is a single physical location where business is conducted or where services or industrial operations are performed. See also "industry classifications".

Family: Household head and one or more persons living in same household who are related to the head.

Household: All persons who occupy a housing unit when it is occupied as separate living quarters.

Housing Unit: For census purposes a housing unit is a house, apartment, mobile home or trailer, group of rooms, or a single room occupied as a separate living quarter or, if vacant, intended for occupancy as a separate living quarter. "Separate living quarters" are those in which the occupants live and eat separately from any other persons in the building and which have direct access from the outside of the building or through a common hall. Housing unit inventory includes recreational vehicles, boats, caves, tents, railroad cars, etc. only if they are occupied as someone's usual place of residence. Vacant mobile homes are included provided they are intended for occupancy on the site where they stand.

Imputed Income: The term as used in Table 9.7 represents the estimated value of home consumption, and gross rental value of farm dwellings.

Index Numbers: An index number measures difference or change, relating one quantity of a specified kind to another quantity of the same kind, usually over periods of time. One kind of price index, the "Implicit Price Deflator for Personal Consumption Expenditures (PCE)", is used in Tables 6.5 and 6.6 with the assumption that price changes between the base year, 1972, and other years were the same in Montana as in the nation as a whole.

Industry Classifications: The Standard Industrial Classification (SIC) System classifies establishments by primary type of activity which is determined by their principal product or group of products produced or distributed, or by services rendered. See Tables 5.4, 5.8, 6.4, 10.2, 10.5, 10.6. Classifications are based on the 1972 edition of the Standard Industrial Classification Manual and its 1977 supplement. The SIC System facilitates the collection, tabulation, presentation, and analysis of data relating to business, industrial, and other types of establishments. It also promotes uniformity and comparability in the presentation of statistical data collected by various government agencies, trade associations, and private research organizations.

Labor Force: Persons 16 years old and over, employed or unemployed, constitute the civilian labor force. The civilian labor force and members of the Armed Forces constitute the labor force. "Not in labor force" refers to persons 16 years old and over consisting mainly of students, housewives, retired workers, seasonal workers in an "off" season who are not looking for work, inmates of institutions, disabled persons, and persons doing only incidental unpaid family work (fewer than 15 hours a week). Also included are the "discouraged workers" who do not have a job and have given up actively looking for work.

Mean/Median/Per Capita Averages: An arithmetic mean is the sum of the values of all items divided by the number of items. Sometimes called the simple average, the mean is used most frequently although it is not always the most meaningful descriptor. Because a mean is affected by very large or very small numbers, a median value may be more useful when considering small sets of numerical data.

Median is the value that divides the distribution (lowest to highest or vice versa) into two equal parts, one half the items falling below this value and one half exceeding this value. If there is an even number of items, the median is the average of the two middle items.

Per Capita is an average computed for every person in a specified population; the total value of an item divided by the number of persons in the specified population.

Net Migration: The excess of people moving into an area over those moving out. Negative net migration means more people left an area than migrated into it. See Table 1.5.

Poverty: Reference is to a set of money income cutoffs or "poverty threshold" against which income of families and specified persons is compared. The income cutoffs vary by family size, number of children, and age of the family householder or unrelated individual. Poverty thresholds are computed annually on a national basis only. No attempt has been made to adjust these thresholds for regional, state, or other local variations in the cost of living.

Residence: In the censuscs each person was counted as an inhabitant of one's usual place of residence, generally meaning the place where one lives and sleeps most of the time. This place is not necessarily the same as one's legal residence, voting residence, or domicile. Members of the Armed Forces living on military installations were counted as residents of the area in which the installation was located; college students as residents of the area in which they were living while attending college; inmates of an institution as residents of the area where the institution was located.

Sample Data: Data based on a sample (e.g., the long-form census questionnaire) are weighted or inflated to produce estimates of what a complete count would have found. The amount of chance error present between an inflated sample figure and a corresponding complete count is relatively small for large areas or large populations. However, for areas with small populations, sample data should be used with caution.

Social Security: For program definitions and history of the provisions of the Social Security Act, see the Social Security Bulletin, Annual Statistical Supplement, Social Security Administration, U.S. Department of Health and Human Services.

Urban/Rural Population: "Urban" and "Rural" are type-of-area concepts. Urban population comprises all persons living in urbanized areas (a central city and surrounding closely settled territory that together have a minimum population of at least 50,000) and in smaller places of 2,500 or more inhabitants outside urbanized areas. Rural population consists of everyone else. Within small counties, measurements of urban and rural populations over time may be significantly affected by the movement of a place's population across the 2,500 population threshold.
